

Discover the real-world impact of your medical research

BMJ Impact Analytics is **the only tool focused on the real-world impact of research on health and social care**. If you fund, publish or produce research or policy, BMJ Impact Analytics tracks where it's cited in Clinical Guidance and Health Policy worldwide.

Make decisions confidently

With **the most comprehensive database of trustworthy citation evidence from clinical, health, medical and policy sources**, curated by BMJ's expert team and updated daily.

Get close to patient care

Inform your research program and funding strategy with the most up-to-date and comprehensive data providing **citation results that include local guidelines and tools used by healthcare professionals to deliver care**.

See your impact in context

Easily see the context and reach of your citations in policy, guidelines and grey literature. Gain insights into the **links between policy documents**.
